

Summer Interdisciplinary Research Initiative

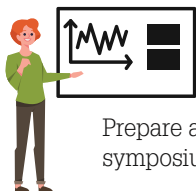

Find your new teammate during the Meet & Greet session

Combine your research interests into a grant proposal and submit it to the judges

Receive the award: A summer stipend for one undergraduate student

Start the project and work as a team for 9 months

Prepare a poster for the annual CMI symposium and compete for cash prizes

And if you feel like it - keep going!

The Comparative Medicine Institute (CMI) Summer Interdisciplinary Research Initiative (SIRI) develops future research leaders in the biomedical sciences through:

- Hands-on, in-depth training
- Mentoring opportunities in many disciplines including genetics, stem-cell and regenerative medicine, pharmacology, infectious disease
- Interdisciplinary coaching – preparing future-ready scientists ready to tackle 21st century challenges
